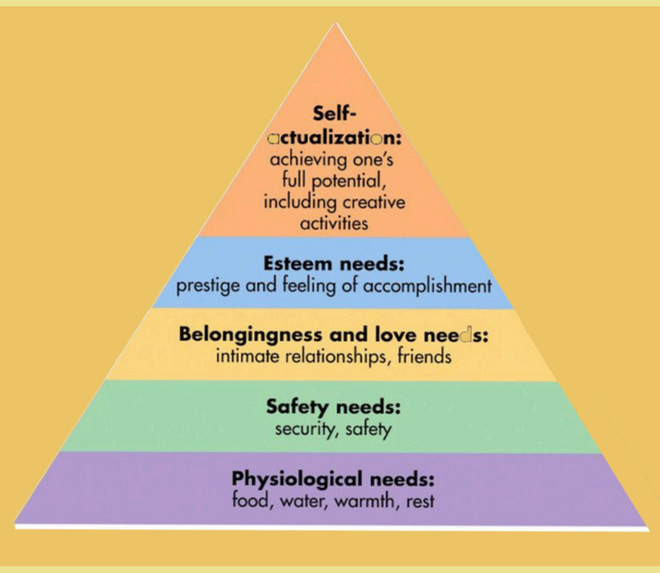
1 INTRODUCTION

Happiness does have a pretty important role in our lives, and it can have a huge impact on the way we live our lives.

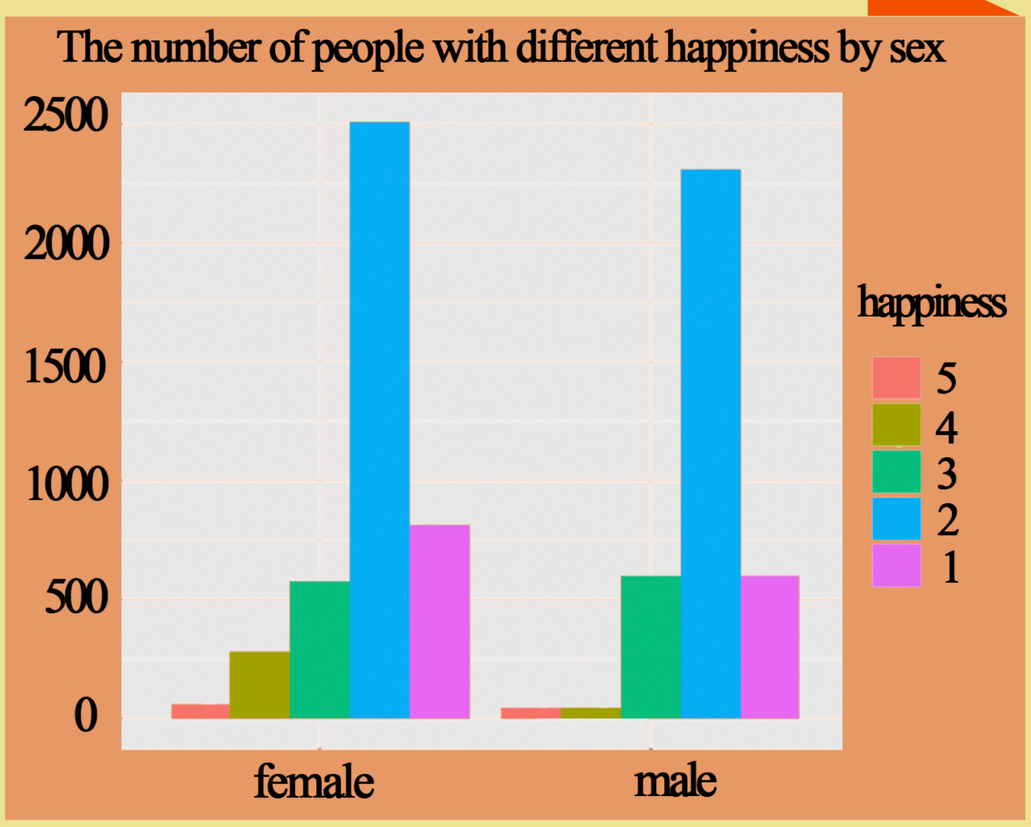
So it seems to be reasonable that our life will be more joyful if we can figure out the commonalities of happiness.

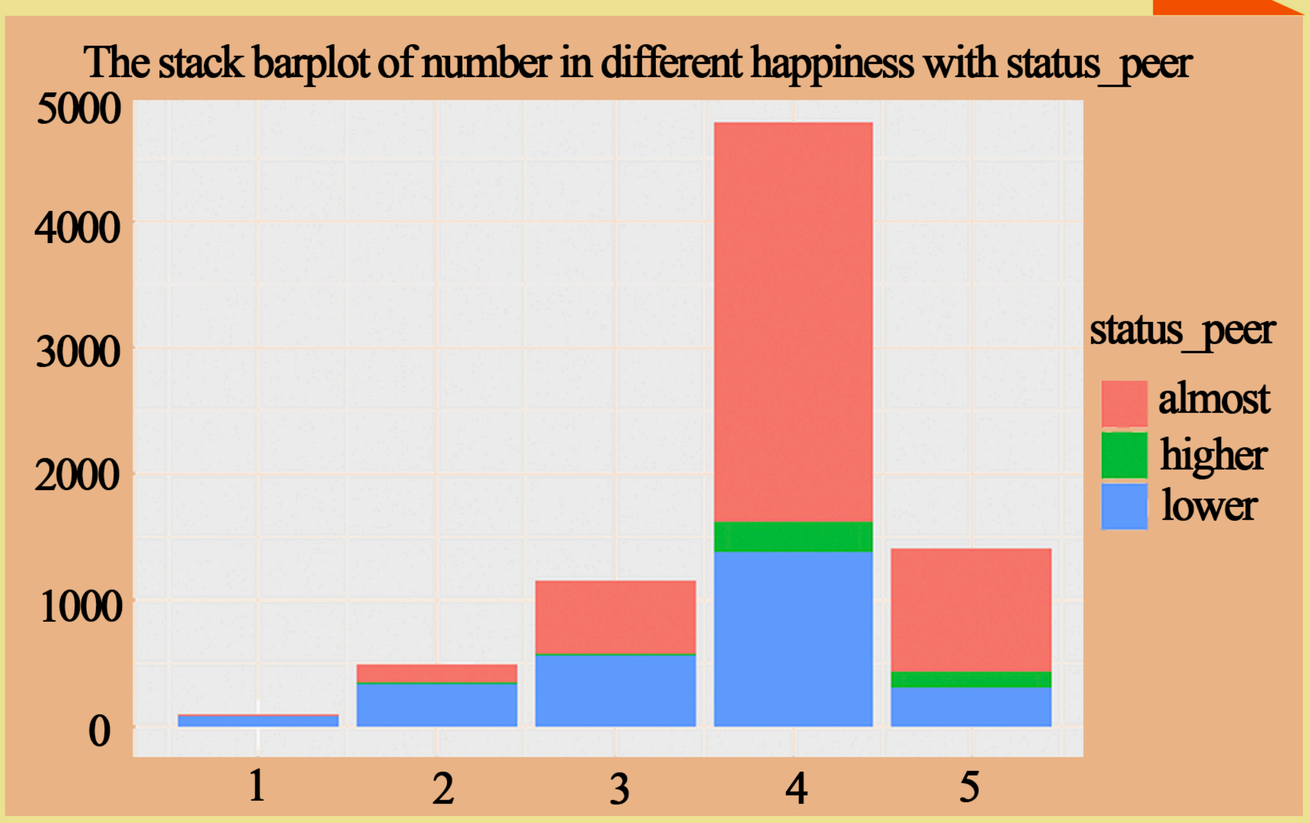


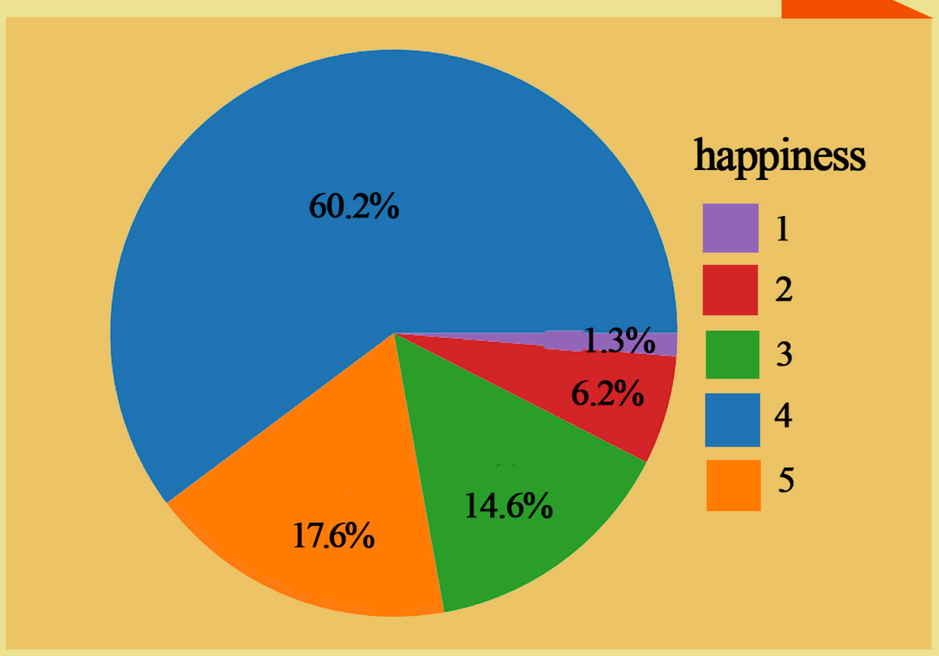
2 APPROACH

- → Split the dataset into train part and test part
- → Calculate the correlation coefficients of the variabes
- → Delete the variables that have strong correlation and filter out 15 significant variables

3 DATA ANALYSIS





4 CONCLUSION


- ✔ Have learned more about algorithms of predictive analytics
- ✔ Have learned how to use tools to perform predictive analytics
- ✔ Have learned something about teamwork and time management
